

Archer Daniels Midland Company

Benefit of Soy

Soy has been a major component of the human diet for thousands of years. Useful in a variety of applications – from soups to salad dressings, from breads to breakfast cereals – soy's versatility is matched only by its beneficial properties.

ADM has been the global leader in the soy ingredients business for over 20 years and is constantly pursuing new ways to deliver solutions in response to customer needs.

Our extensive line of soy products include:

- Isolated soy proteins: CLARISOY™ and Pro-Fam®
- Arcon® soy protein concentrate
- TVP® (textured vegetable protein)
- TVC® (textured vegetable crumbles)
- Ultralec® Lecithin Granules
- Soy flours and soy grits
- CardioAid™ plant sterol ester
- NovaSoy® Isoflavones
- Natural Source Vitamin E

For customers around the world, ADM draws on its resources – its people, products and market perspective – to help them meet today's consumer demands and envision tomorrow's needs.

- Healthy Aging
- Weight Management
- Vegetarian / Vegan
- Meat Processing
- Children's Health
- Sports Nutrition

Pro-Fam, Arcon, TVP, TV, Ultralec and Novasoy are registered trademarks of Archer Daniels Midland Company.

CLARISOY and CardioAid are trademarks of Archer Daniels Midland Company.

ADM/Matsutani LLC

Fibersol®'s line of ingredients allows manufacturers the ability to "close the gap" and reach desired fiber content/label claims with no effects on taste or viscosity. Manufacturers can provide products for health-conscious consumers that give them the dietary fiber they need without sacrificing the taste, aroma and texture they want. Fibersol's line of ingredients can easily be added to existing formulations with minimal adjustments, making Fibersol® ideal for line extensions. There is virtually no application that Fibersol® ingredients can't fit into, and the high-quality fiber ingredients stay consistent no matter what the form (agglomerated, liquid, etc.).

Fibersol®-2 digestion-resistant maltodextrin is a soluble corn fiber that acts as a low-calorie bulking agent containing 90 percent dietary fiber. It can be used in almost any food or beverage application to maintain or improve a product's desired attributes. Even at significant levels, Fibersol®-2 doesn't affect taste or viscosity. It has numerous starch linkages that remain undigested by enzymes of the human digestive tract. It has been recognized as GRAS (generally recognized as safe) by the Food and Drug Administration and certified Kosher and Pareve by the Orthodox Union. A variety of functional, physical, and sensory attributes of Fibersol®-2, digestion resistant maltodextrin, will bring opportunities to food and beverage applications.

Fibersol®
fiber fit for all!
