

ADM/Matsutani LLC

Fibersol®'s line of fiber ingredients allows manufacturers to develop products for health conscious consumers that gives them all the dietary fiber they need without sacrificing the taste, aroma and texture they want. And with the other functional benefits such as replacing calories from sugar and fat, along with providing an increased feeling of satiety, you can have it all with Fibersol®.

Supports Digestive Health

Fibersol®-2, the premier slow fermentation soluble dietary fiber, has been shown in clinical studies to help support intestinal health. When formulating products for digestive health, it is critical to meet a consumer's need for a great tasting product while using ingredients that are easy to use and well tolerated. Fibersol®-2 is tasteless, improves body/texture, offers masking properties while it provides the benefits of a good fiber with superior digestive tolerance. It is also high soluble, provides a clear and transparent solution, acid and heat stability, very low viscosity, is water binding and has very low hygroscopicity.

Fibersol®-LQ

ADM/Matsutani also offers Fibersol®-LQ corn syrup, a soluble corn fiber, delivering 75% dietary fiber and 25% sugars (dry basis) in a liquid form that is easy to handle. This reduced calorie corn syrup, containing 2.05 kilocalories per gram (dry basis), has high solubility and provides sweetness and humectancy similar to a standard corn syrup. Fibersol®-LQ has no added flavor, forms a transparent solution while adding minimal viscosity, and is heat and acid stable.

Visit the new www.fibersol.com site and find out why Fibersol®-2 is the fiber you want in your next product.

Fibersol®
fiber fit for all!
